

SP4622 Silicone Pad - Fits 1/2 tray DINT4825

Long Life Re-usable Silicone Protection Pad for use in Sterile Services and Decontamination Units

The Warwick Range of polypropylene products from Warwick SASCo was originally designed to offer an alternative to stainless steel products traditionally used in Hospitals.

This Range is now widely used in Sterile Services and Decontamination Units, Operating Rooms and Clinics due to its low cost, effective product design, and repeat performance results in hospital autoclaves.

Easily recognised by its distinct blue colour, the Warwick Range includes bowls, gallipots, kidney dishes, instrument trays, instrument protection, instrument boxes, traceability tags, measuring jugs, scope and instrument

Product Benefits

- Half size pad to fit 1 half of DINT4825
- Autoclavable silicone protection pads to protect delicate instruments during washing, sterilization and transportation.
- Long silicone fingers hold instruments securely in place.
- Pliable pad with perforations for maximum water penetration and steam circulation - gives improved cleaning and drying results.
- Lightweight, strong and durable.
- Can be sterilized by Autoclave, Ethylene Oxide or Hydrogen Plasma.

Product Specification

- Half Size Silicone Pad compatible for use with DIN4825 Tray
- 230mm x 220mm
- Pack Size 6
- The following standards are applicable:
 - **ISO 9001:2008**
Quality Management System
 - **ISO 13485:2003**
Medical Devices - Quality Management System
 - **ISO 17664:2004**
Sterilization of Medical Devices - Guidelines for the processing of re-sterilizable medical devices
- Maximum processing temperature 200° C

Guide to Using Warwick Products from Warwick SASCo

Cleaning

- Product should be washed before first use - maximum temperature 200°C.
- Warwick Products are designed for a lengthy service and guaranteed for 1000 washes and sterilizations. Scouring and abrasive cleaners will reduce the performance of products. Acid/Amine solutions are extremely corrosive and must be used in the correct dilution according to manufacturers instructions.
- Silicone is not suitable for extended immersion in acid based cleaning solutions.

Storage

- This product has a shelf life of 12 months from date of manufacture providing the recommended storage conditions are adhered to.
- Product should be stored in its primary packaging, off the floor on a pallet or shelf, and in a clean dry ventilated room at a temperature of 4 °C - 25 °C.
