

SP4724 Silicone Pad - For large medal DIN tray

Long Life Re-usable Silicone Protection Pad for use in Sterile Services and Decontamination Units

Product Benefits

- Autoclavable silicone protection pads to protect delicate instruments during washing, sterilization and transportation.
- Alternate low and high silicone fingers raises surgical instruments higher, giving better water and steam penetration and improved drying results. Also makes delicate instruments more accessible and easier to pick up.
- Small feet under the silicone base raise the pad above the instrument tray, giving improved water penetration and drainage.
- Improved mat size and diagonal cut off corners make inserting and removing the mats easier and give an improved tray fit.
- Lightweight, strong and durable.

Product Specification

- Silicone Pad compatible for use with Large Metal DIN Tray
- 470mm x 245mm
- Pack Size 10
- The following standards are applicable:
 - ISO 9001:2008
 - Quality Management System
 - ISO 13485:2003
 - Medical Devices Quality Management System
 - ISO 17664:2004
 - Sterilization of Medical Devices Guidelines for the processing of re-sterilizable medical devices
 - Maximum processing temperature 200° C

Guide to Using Warwick Products from Warwick SASCo

Cleaning

- Product should be washed before first use maximum temperature 200°C.
 - Warwick Products are designed for a lengthy service and guaranteed for 1000 washes and sterilizations. Scouring and abrasive cleaners will reduce the performance of products. Acid/Amine solutions are extremely corrosive and must be used in the correct dilution according to manufacturers instructions.
- Silicone is not suitable for extended immersion in acid based cleaning solutions.

Storage

- This product has a shelf life of 12 months from date of manufacture providing the recommended storage conditions are adhered to.
- Product should be stored in its primary packaging, off the floor on a pallet or shelf, and in a clean dry ventilated room at a temperature of 4 °C - 25 °C.

The Warwick Range of polypropylene products from Warwick SASCo was originally designed to offer an alternative to stainless steel products traditionally used in Hospitals.

This Range is now widely used in Sterile Services and Decontamination Units, Operating Rooms and Clinics due to its low cost, effective product design, and repeat performance results in hospital autoclaves.

Easily recognised by its distinct blue colour, the Warwick Range includes bowls, gallipots, kidney dishes, instrument trays, instrument protection, instrument boxes, traceability tags, measuring jugs, scope and instrument soaking containers.
